We have gained specialization of offering an unmatched quality range of Industrial Hardware Items that are procured from reliable and reputed Manufacturers, OEMs and Vendors who are Known for their high quality standards. We make sure that the products we buy from our vendors have distinct features such as Design, Corrosion Resistance and Durability.

Under the able guidance of our mentor “Mr. Suresh Patel”, who has rich industry experience and domain expertise that has helped us to grow tremendously in the industry. His networking skills and business acumen has helped us in maintain strong relationship with all our partners and stakeholders - our employees, our customers, our vendors and our dealers.

Our Team

We attach importance to our team members as they considered being the backbone of our company. They have been selected on the basis of their qualification, experience and suitability to our range of business. Backed by a strong workforce, we are in a position to control the market due to their hard work and devotion. All our staff members in various departments are in a position to understand our customers' specific requirements. All our efforts are aimed towards providing products that help the customers in a positive manner optimize their operations and cater to all their industrial needs and requirements.

Quality Standard

We are a quality conscious organization and all steps possible to ensure that our products are at par with various national and international quality standards. To achieve the same, we have developed various quality polices which are designed, developed and implemented by our team of qualified quality controllers.

- Carefully selecting the vendors
- Ensuring all products are checked on various quality and performance parameters
- Proper storage of products
- Quality packaging

Health Safety and Environmental policy Statement

RSP is committed to the health, safety and well-being of its employees, clients, Subcontractors and all others that may be impacted by its operations. RSP is also committed to the protection and improvement of the environment in which it operates. RFP will conduct all its work in accordance with the statutory requirements.

RSP recognizes that good health, safety and environmental performance is paramount and, therefore, will provide all necessary funding to carry out its activities to ensure that all risks are minimized. It will achieve this by:

- **Eliminating hazards, conditions and situations that give rise to potential accidents. Where this is not practicable then measures will be put in place to reduce these hazards to a manageable level.**
- **Training employees in safe working practices and ensuring that this knowledge is regularly updated.**
- **Consulting with employees' representatives on the matter of health and safety on a regular basis and stressing that continuous improvement is the responsibility of management and employees alike.**
- **Providing a safe working environment which takes into consideration the necessary protection of employees with regard to access and egress, machinery, lighting, housekeeping, safe working procedures and safe use of substances etc. Where this is not possible or practicable then protective equipment will be provided to protect against the hazards identified.**
- **Providing adequate first aid and fire fighting facilities, as well as accident prevention and health surveillance, to improve standards of safety and reduce accidents and lost time.**
- **Ensuring employees understand their duties under the health, safety and environmental legislation.**
- **Conducting its business in an environmentally sensitive manner, taking appropriate measures to avoid causing environmental damage and reducing environmental impacts to a minimum when these are unavoidable.**
